

Dear FCC people,I do not appreciate NAB'S attempt to hinder XMradio's progress.
They have a service that the country has been needing.

I enjoy most of the stations, but the traffic and weather has been a timesaver and a half for me. I am a salesman and travel to my clients offices for roughly 7 hours per day. The XMradio informs me where to avoid, thus saving time, gas, money and helps decrease the air pollution caused by traffic jams. If any of you people have not tried XMradio, why don't you, you might learn something. I believe America is supposed to be free, helping people for a fee is not illegal. Have you ever listened to the free radio traffic reports? Not very good are they! IF YOU LIKE FREEDOM, LESS POLLUTION, EFFICEINCY, EMPLOYMENT IN A LOCAL BUSINESS AND CARE ABOUT SAVING NATURAL RESOURCES, PLEASE REJECT PETITION 04-160.

Thank you
